The University Pennsylvania

Too whom it may concern,

This letter is to express my interest in Cultural Heritage Programmer position at Penn Libraries. While doing my undergraduate studies at Drexel in Computer Engineering, I got the impression Penn would be an attractive employer for those looking to solve interesting problems. With my past experience in data/software engineering roles at Bloomberg, Comcast and G3, I am confident I will be an asset to your organization.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set. Because of this I believe I could quickly get up to speed with the elements of your tech stack I have not yet used.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- Skilled in Python and Shell Scripting,
- Understanding of data structures and algorithms
- Proven track record of writing extensive and thorough documentation

Thank you for your time and consideration. I look forward to speaking with you on Monday about this opportunity.

All the best,

Owen Brooks
